**Subject:** Re: FW: (TEST) EPA GMG29000 2022 Permit Effective: 60 Day Renewal Period Underway

Thanks. I thought that was probably the case but wanted to confirm.

Good morning Greg,

No it has not become effective yet. Let me forward this to our hq to see what I can find out.

Nichole -

I had a few operators receive the email below. Has the new permit become effective? Note the highlighted statement.

Please let me know as soon as possible; I have some confused people in industry right now.

Dear NeT User,

The 2022 GMG290000 general permit became effective on 2022-10-25 for EPA Region 6. On September 30, 2022 the 2017 GMG290000 general permit expired and the operator identified as ANADARKO PETROLEUM CORPORATION and its associated permitted features were automatically changed to a coverage status of Administratively Continued (Admin Continued). As an existing operator, in order to renew coverage, you must submit a request to renew your operator first and then additional Notices of Intent (NOIs) must be submitted for each permitted feature assigned to the NPDES ID GMG290006 under the 2017 GMG290000 general permit. Submission of updated operator information is required before operators can certify the renewal of the permitted features. Any Operators and associated permitted features that are not renewed within 60 days of the effective date of the 2022 GMG general permit will expire automatically on 2023-01-30.

Instructions on how to renew operator, filing NOIs for renewal of coverage, and updating operator information can be found at the [Net Training Materials website](#). If you have any questions regarding the reissuance of the GMG290000 general permit, please contact Nichole Young (GMG290000 OCS General Permit writer for EPA Region 6) at (214) 665-6447 or [young.nichole@epa.gov](mailto:young.nichole@epa.gov) . You can view the GMG290000 general permit and other offshore related information at the [EPA Region 6 website](#).

If you have questions about this email or about NeT GMG, please refer to [NeT Support](#) or e-mail [NPDESereporting@epa.gov](mailto:NPDESereporting@epa.gov) for assistance.
